

CISC 4900 Project: BeautyNest | Front-End Test File

Testing Focus

UI, UX, layout, page structure, responsiveness, and user interaction testing for the BeautyNest homepage.

Testing Objective

The purpose of this testing is to verify that the homepage front-end displays correctly, remains responsive on different screen sizes, and provides clear user interaction through navigation, buttons, hover effects, and layout consistency.

Test Environment

- Browser: Google Chrome
- Device types: Desktop, tablet, and mobile
- Screen sizes tested: Desktop (1920 x 1080), Tablet (768 x 1024), Mobile (375 x 667)

Test Cases

Test ID	Feature	Test Description	Steps	Expected Result	Actual Result	Status
TC-01	Header	Check if the site title and tagline display properly.	Open homepage.	BeautyNest title and tagline are centered and readable.	Header displayed correctly.	Pass
TC-02	Navigation Bar	Check navigation menu layout.	Open the homepage and review the navigation bar.	Home, Necklaces, Earrings, Bracelets, Oil & Accessories, cart, login, and search box appear aligned properly.	Navigation displayed correctly.	Pass
TC-03	Hero Image	Check hero/banner image display.	Open homepage.	Large banner image loads clearly without distortion.	Hero image displayed correctly.	Pass
TC-04	Main Text Overlay	Check text readability over the hero image.	Open homepage.	The main text is readable and visually clear on the image background.	Text displayed clearly.	Pass
TC-05	About Us Button	Check button visibility and click response.	Click the About Us button.	Button is visible and responds correctly when clicked.	Button responded correctly.	Pass
TC-06	Search Box UI	Check search box placement and appearance.	Open homepage.	Search box is visible, aligned, and readable.	Search box displayed correctly.	Pass
TC-07	Cart Icon	Check cart icon and item count display.	Open homepage.	Cart icon and count appear properly in the navigation bar.	Cart icon displayed correctly.	Pass
TC-08	Footer	Check footer display.	Scroll to the bottom of the page.	Footer text is visible and aligned properly.	Footer displayed correctly.	Pass

TC-09	Hover Effects	Check hover behavior on navigation links and buttons.	Hover over menu items and the button.	Hover effect appears and gives visual feedback.	Hover effect worked correctly.	Pass
TC-10	Responsive Layout	Check the homepage on different screen sizes.	Resize the browser or use device mode.	Layout remains readable and usable without overlap.	Layout adjusted correctly.	Pass

Summary

The homepage front-end was tested for layout, navigation, responsiveness, and interactive elements. The header, navigation bar, hero image, text overlay, search box, cart icon, footer, hover effects, and button interactions all displayed properly. The page remained visually clear and usable across different screen sizes.

Notes

This testing document focuses on front-end presentation and user interaction for the homepage. Functional logic implemented by teammates, such as deeper search processing, may be documented separately if needed.
